Percentage of Unplanned Re-attendances			Total time spent in A&E department		
 <p><b>% of Unplanned Re-attendances</b></p> <p>The unplanned re-attendance rate for June 2018 was 0.26%; the highest we have reported in the last 25 months was 0.44% for March 2017. The rate for this month remains within the 5% standard. The benchmarking is extracted from the A&amp;E HES Data</p>	<p>Description of Data</p> <p>The unplanned re-attendance rate for June 2018 was 0.26%; the highest we have reported in the last 25 months was 0.44% for March 2017. The rate for this month remains within the 5% standard. The benchmarking is extracted from the A&amp;E HES Data</p>		 <p><b>Admitted &amp; Non Admitted-Longest Time Recorded</b></p> <p>The longest time recorded in A&amp;E for all patients for June 2018 was 13:39 Hours, the highest we have reported in the last 25 months was 22:26 Hours for December 2016. The longest time recorded was below the standard of 04:00 Hours. The longest wait Benchmarking is particularly sensitive to poor data quality and definitional issues, which is why some unusually high values may be observed, therefore no benchmarking has been used.</p>	<p>Description of Data</p> <p>The Longest time recorded (95th Percentile) in A&amp;E for all patients for June 2018 was 04:28 Hours; the highest we have reported in the last 25 months was January 2017 at 07:42 Hours. The benchmarking is extracted from the A&amp;E HES Data</p>	
<p>The unplanned re-attendance rate for June 2018 was 0.26% showing a reduction of 0.11% patients making an "unplanned" re-attendance compared to May 2018 where the re-attendance rate was 0.37%. The Trust remains consistently within the 5% standard.</p>	0.26%	Rate This Month	13:39	Rate This Month
