Percentage of Unplanned Re-attendances		Total time spent in A&E department	
	<p>Description of Data</p> <p>The unplanned re attendance rate for March 2019 was 0.31%; the highest we have reported in the last 25 months was 0.44% for March 2017. The rate for this month remains within the 5% standard. The benchmarking is extracted from the A&E HES Data</p>		<p>Description of Data</p> <p>The longest time recorded in A&E for all patients for March 2019 was 17:27 Hours, the highest we have reported in the last 25 months was 23:08 for January 2019. The longest time recorded was below the standard of 04:00 Hours. The longest wait Benchmarking is particularly sensitive to poor data quality and definitional issues, which is why some unusually high values may be observed, therefore no benchmarking has been used.</p>
<p>The unplanned re-attendance rate for March 2019 was 0.31%, a reduction of (0.10%) patients that made an "unplanned" re-attendance compared to February 2019 where the re-attendance rate was 0.41%.</p>	<p>0.31% Rate This Month</p>	<p>In March 2019, the longest time recorded in A&E was 17:27 hours. This was a patient that was brought to A&E by 999 Ambulance from a care home, following a fall. On arrival the patient was assessed and a full set of observations & investigations were carried out. Further investigation and observations were necessary and clinical observations were maintained. The patient was made comfortable on a hospital bed and following confirmation of no fractures demonstrated and no further clinical concern the patient was admitted to the Clinical Decision Unit where a full RAPT's assessment was carried out by the Trusts Integrated Discharge Team following which transport back to the patients Care Home was arranged and the patient was discharged.</p>	<p>17:27 Rate This Month</p>
<p>The Trust remains consistently within the 5% standard.</p>	<p>Better Compared to last Month</p>	<p>Better Compared to last Month</p>	<p>Better Compared to last Month</p>
