Percentage of Unplanned Re-attendances		Total time spent in A&E department	
<p>% of Unplanned Re-attendances</p> <p>The unplanned re attendance rate for October 2019 was 0.42%; the highest we have reported in the last 25 months was 0.46% in August 2019. The rate for this month remains within the 5% standard. The benchmarking is extracted from the A&E HES Data</p>	<p>Admitted & Non Admitted - Longest Time Recorded</p> <p>The longest time recorded in A&E for all patients for October 2019 was 23:52 Hours, this is the highest we have reported in the last 25 months was. The longest time recorded was below the standard of 04:00 Hours. The longest wait Benchmarking is particularly sensitive to poor data quality and definitional issues, which is why some unusually high values may be observed, therefore no benchmarking has been used.</p>	<p>Admitted & Non Admitted - Longest Time Recorded 95th Percentile</p> <p>The Longest time recorded (95th Percentile) in A&E for all patients for October 2019 was 06:13 Hours; the highest we have reported in the last 25 months was 06:22 for September 2019. The benchmarking is extracted from the A&E HES Data</p>	<p>Description of Data</p> <p>The unplanned re-attendance rate for October 2019 was 0.42%, an increase of patients that made an "unplanned" re-attendance compared to September 2019 where the re-attendance rate was 0.41%. The Trust remains consistently within the 5% standard.</p>
<p>0.42%</p> <p>Rate This Month</p> <p>Worse</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>23:52</p> <p>Rate This Month</p> <p>Worse</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>06:13</p> <p>Rate This Month</p> <p>Better</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>Description of Data</p> <p>The time waiting in A&E (95th Percentile) for both admitted and non-admitted patients in October 2019 was 06:13 hrs showing a decrease of 00:09 mins (95th Percentile) compared to September 2019 which was 06:22hrs. All care groups work closely to reduce the time it takes for ALL our patients to be seen/treated/discharged or admitted following A&E attendance. Operational meetings continue to be held four times each day to look at any blockages, discharges and review bed capacity.</p>
Percentage of people who leave the A&E Department without being seen		Time from arrival to start of definitive treatment from a decision making clinician (Median)	
<p>% of people who leave the A&E Department without being seen</p> <p>The percentage of people who left the A&E Department without being seen for October 2019 was 2.8%; the highest we have reported in the last 25 months was July 2018 at 3.7%. The rate for this month was within the 5% standard.</p>	<p>Admitted - Longest Time Recorded 95th Percentile</p> <p>The time taken from patient arrival to admission (95th percentile) in October 2019 was 09:04 hours, a decrease of 00:26 mins compared to September 2019 which was 09:30 hours (95th percentile) The daily Trust Operational meetings ensure that all care groups are up to date with any capacity and flow issues throughout the organisation, and, that all escalation plans are followed and actions to restore deployed.</p>	<p>Non Admitted - Longest Time Recorded 95th Percentile</p> <p>The waiting time (95th Percentile) for non-admitted patients in October 2019 is 04:00 hours, which is a decrease of 1 hour compared to September 2019 when it was 05:00 hours. We continue to remain committed to ensuring that all our patients are seen as quickly as possible by the most appropriate clinician.</p>	<p>Description of Data</p> <p>The percentage of people leaving A&E without being seen throughout October 2019 was 2.8% 0.7% decrease compared to September 2019. We remain committed to ensuring patients are kept informed of delays during busy times and ensure waiting times are displayed and updated frequently.</p>
<p>2.80%</p> <p>Rate This Month</p> <p>Better</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>09:04</p> <p>Rate This Month</p> <p>Better</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>04:00</p> <p>Rate This Month</p> <p>Better</p> <p>Compared to last Month</p> <p>Data Quality</p>	<p>Description of Data</p> <p>The Longest time recorded (95th Percentile) in A&E for non admitted patients for October 2019 was 04:00 Hours; the highest we have reported in the last 25 months was 05:00 for September 2019. The benchmarking is extracted from the A&E HES Data.</p>
Time to Initial Assessment (Ambulance Patients only) - 95th Percentile		A&E: Maximum waiting time of four hours from arrival to admission/ transfer/ discharge	
<p>Time to Initial Assessment (Ambulance Patients only) - 95th Percentile</p> <p>The Time to Initial Assessment (95th Percentile) for ambulance patients for October 2019 was 00:16. This report shows the time (in whole minutes) between patients' arrival and their initial assessment. The longest time we have reported in the last 25 Months was 00:25 in March 2019. The benchmarking data is extracted from the A&E HES Data.</p>	<p>Time from arrival to start of definitive treatment from a decision making clinician (Median)</p> <p>The time from arrival to start of definitive treatment (Median) from a decision-making clinician in October 2019 was 01:00 hrs, showing a decrease of 0.05 mins compared with September 2019 which was 01:05 mins A decision-making clinician includes a Doctor or Emergency Nurse Practitioner.</p>	<p>A&E: Maximum waiting time of four hours from arrival / admission / transfer / discharge</p> <p>The A&E Maximum waiting time of four hours from arrival to admission/transfer/discharge during October 2019 was 90.3% an increase of 1.6% compared to September 2019 when it was 88.7% The Trust continues to work really hard to ensure all our patients are seen as quickly as possible.</p>	<p>Description of Data</p> <p>The Time to Initial Assessment - "Time from arrival to time of assessment by a senior clinician" for patients arriving by ambulance in October 2019 was 00:16 mins a decrease of 0.03 mins compared to September 2019 which was 00:19 mins</p>
