Seminar

## **Community-acquired pneumonia**

Community-acquired pneumonia is a major global health challenge that disproportionately affects vulnerable populations, including older people, immunocompromised people, those with chronic conditions, and young children.

Lecture

## **Advancing women, maternal, newborn, and child health equity**

These are two lectures that form the Virchow Prize Lecture given by the authors in October, 2025. The first lecture was given by Quarraisha Abdool Karim and Jivanka Mohan. The second lecture was given by Zulfiqar A Bhutta.

World report

## **Canada's loss of measles-free status highlights public health gaps**

Falling vaccination rates and a disjointed surveillance system have been blamed for a resurgence in measles in Canada. Paul Webster reports.

Perspectives

## **Words and silence**

Doctors sometimes meet with patients in suicidal crises; for psychiatrists and general practitioners it is part of our routine clinical work

Full text options: [https://libkey.io/libraries/1656/10.1016/S0140-6736\(25\)02374-8](https://libkey.io/libraries/1656/10.1016/S0140-6736(25)02374-8)

Perspectives

## **The eleventh commandment**

My earliest memories all take place at my grandmother's house. On the nights when I had sleepovers at her apartment, I would get to indulge in my favourite activity

Full text options: [https://libkey.io/libraries/1656/10.1016/S0140-6736\(25\)02377-3](https://libkey.io/libraries/1656/10.1016/S0140-6736(25)02377-3)

Correspondence

## **Catch-up growth after switch to asciminib in a twin with chronic myeloid leukaemia**

Tyrosine kinase inhibitors (TKIs) that inhibit the activity of the causative BCR::ABL1 oncoprotein have revolutionised chronic myeloid leukaemia (CML) treatment. Imatinib and

second-generation TKIs target the catalytic binding site of ABL1, albeit with varying degrees of kinase specificity, resulting in different downstream effects.

Article

**Efficacy of once-daily, high-dose, oral insulin immunotherapy in children genetically at risk for type 1 diabetes (POInT): a European, randomised, placebo-controlled, primary prevention trial**

Type 1 diabetes begins with autoimmunity against pancreatic islet antigens, including insulin. The aim of the Primary Oral Insulin Trial (POInT) was to evaluate the efficacy and safety of daily high-dose oral insulin to prevent the development of islet autoantibodies and diabetes.
