

The Pee Plotter

This is our very own 'Pee Plotter'. First Identify your patients **WEIGHT** and then check this against the values of urine passed. **GREEN** is your target outcome, while **RED** indicates that action is required. All values are measured in **MILLILITRES**.

Weight	1 hour	6 hours	12 hours	24 hours					
					85 KG	60	357	714	1428
						43	255	510	1020
50 KG	35	210	420	840	90 KG	63	378	756	1512
