

Re: Your request made under the Freedom of Information Act 2000

I have a Freedom of Information request that I wonder if you could help me with Within your health trust how many patients are currently (within the past 3 months) being treated with the following regardless of patient diagnosis

We can't answer the question from our pharmacy system; as we don't keep details of the combination regimes. Although, some of this might be available from the two chemo care systems, we can't provide as one of the systems belongs to STH. The only other way is to go through paper records which would take longer than the s.12 time scale of the FOIA.

However, we can provide details of patients by the individual drug preparations:
