Our Ref: 406/2021  
February 2021

- d) The number of patients admitted who tested positive for SARS AND who showed signs and symptoms of CoViD19

**The number of patients admitted who tested positive for SARS and who showed signs and symptoms of COVID-19 as we test everyone so don't record those with symptoms to differentiated positive results by symptomatic/asymptomatic**

- e) The number of patients admitted into ITU with serious signs and symptoms of CoViD19, e.g. ARDS, abnormal clotting, other inflammatory symptoms including gastrointestinal and cardiac.

**The number of patients admitted into ITU with serious signs and symptoms of COVID-19, e.g. ARDS, abnormal clotting, other inflammatory symptoms including gastrointestinal and cardiac. As again it is asking for patients admitted with symptoms. We can provide the number of patients admitted directly to ITU who tested positive or any patient who had a ward stay on ITU (at any point of their inpatient stay) that tested positive.**

- f) a breakdown of a – e on a week by week basis.

**Please refer to the above.**
