## Re: Your request made under the Freedom of Information Act 2000

Dear Sir/Madam,

I would like to make a Freedom of Information (FOI) request for the following data please.

How many NHS staff currently working at your trust remain unvaccinated with a Covid19 vaccine? Including bank/agency workers.

What percentage of your overall staff does this equate to?

In terms of number of staff who have been vaccinated is that according to the records we have available 94% of our staff have been double vaccinated. We do not have access to the vaccination levels of bank and agency workers as they are not employed by the Trust

Since the start of the pandemic (01/03/20), with your data from staff absence due to Covid19, contact tracing and Healthcare acquired infection (HCAI), what percentage of HCAI is directly attributable to Covid19 infection in an NHS frontline worker?

Since the vaccination programme has started (Approx Dec 2020), what is the breakdown of this being from a covid 19 vaccinated NHS worker or unvaccinated NHS worker?

If not directly attributable, what is the rate of inpatients on non Covid19 wards getting a HCAI and becoming infected with Covid19 within a set time frame (~10days) of an NHS worker on that ward testing positive for Covid 19? And what is the breakdown of this being a Covid19 vaccinated NHS worker or non-vaccinated NHS worker?

We do not have this information collated in any information systems. It would take over twenty hours to review all healthcare associated C19 infected patients and determine if there is a link to a staff positive therefore these questions are exempt under section 12
