Re: Your request made under the Freedom of Information Act 2000

I am writing to request some information and data under the freedom of information act, in regards to the amount of patients currently being treated for COVID 19 within all Doncaster based hospitals. I would like the EXACT amount of patients admitted and treated for COVID, and COVID alone, per month over the last 12 months. I would also like the total number of patients that have been recorded as a COVID patient even if they have been admitted to hospital for other health related reasons or appointments and then subsequently tested positive regardless of whether they were symptomatic or not.

The number of patients at 8am on 28/01/22 currently being treated for active COVID is 70 at Doncaster Royal Infirmary (DRI).

Please see below the number of patients who were admitted to DRI between 1st January 2021 and 31st December 2021 who were treated for COVID. This broken down monthly by the admission date and where DRI was the admitting hospital. This shows all patients treated for COVID regardless of COVID being a contributing factor to their admission. In regards to the part of the FOI that asks for people who have been admitted solely for COVID – We cannot get this data as many patients have concurrent diseases. As such there is no way to identify whether these contributed to the patient’s admission.

Month	Number of COVID Patients Per Month
January	350
February	200
March	101
April	48
May	24
June	22
July	121
August	163
September	126
October	165
November	176
December	243
