JULY 2023

Re: Your request made under the Freedom of Information Act 2000

The number of Doncaster Teenage Young Adult (16-24) patients diagnosed with cancer and their diagnoses in each quarter in 2023 so far

We would not treat these patients in Paediatrics. Any young people above the age of 16 would be referred to adult specialties unless they had special educational needs. We do not diagnose or treat children with cancer in our service, they would be referred to tertiary care.
