Re: Your request made under the Freedom of Information Act 2000

Dear Doncaster and Bassetlaw Teaching Hospitals NHS Foundation Trust,

Please can you answer the following questions regarding the sharing of test results with patients.

Does your trust share test results digitally with patients?

No – Results from the trust are not shared digitally

What system do patients use to access their test results digitally? (e.g. PKB, EPIC My chart, Other - please state)

Please list which hospital departments are sharing tests results digitally?

Which results (if any) are not automatically shared digitally with patients?

Do you delay sharing digital test results? Please state how long this delay is (7 days, 14 days, 21 days, 28 days, or longer).

If you are not currently sharing test results digitally please state when you plan to start sharing.

This would be implemented as part of our future EPR roll out.
