Re: Your request made under the Freedom of Information Act 2000

For each Trust, please can you provide all Food Hygiene inspection results/reports, details of subsequent enforcement actions taken, and all supporting documents relating to the inspection and any subsequent actions.

I am primarily interested in the main Trust hospital, or hospitals, but if there are inspection reports from other sites managed by the Trust, please provide these as well.

Please can you provide all the information, reports, and documentation, going back three years.

Please see attached documents to support the response to this FOI request.

DRI and MMH didn't have an EHO visit in 2021.
