Re: Your request made under the Freedom of Information Act 2000

Please could I have a list of all the available therapies, treatments, medication and any other options for patients referred to the tier 3 and 4 weight management service.

We are currently not commissioned to provide any injectable medications for obesity / weight management through our Tier 3 or 4 services. We do have PGD in place to provide Orlistat medication for 12 weeks as part of the Tier 3 services.

The Tier 3 service is currently a 12 month MDT service offering dietitian, nutritionist, dietetic assistant, CBT and physiotherapy prior to referral onto Tier 4 (bariatric surgery) if appropriate.

In Doncaster Tier 3 is for those patients who wish to proceed to bariatric surgery only but in Bassetlaw is open to all those who meet the criteria.

In Doncaster and Bassetlaw we offer Tier 4 bariatric surgery; the primary operations we offer are gastric band, sleeve gastrectomy and gastric bypass. (in very specific circumstances we may perform intra gastric balloons, these are utilised as a bridge to permanent procedures for high risk patients)
